

OPTIMUM INFINITE

CHANGE THE POSSIBILITIES

200 Dk

Oxygen
Permeability

1341 MPa

Flexural
Modulus

>91% (Blue UV)

Visible Light
Transmission

1.438 (@20°C)

Refractive
Index

**Available in
Ice Blue**

**UV Blocker
Included (Class II)**

**Compatible with
Tangible Hydra-PEG™**

PERFECT FOR SCLERAL LENSES

Optimum Infinite was developed in partnership with you! This breakthrough was motivated by the requirements raised for a dedicated scleral material at several laboratory panel and Key Opinion Leader meetings.

Also ideal for corneal
and ortho-k lens designs.
