

# COOPERVISION SPECIALTY EYECARE INTRODUCES THE MAKE A DIFFERENCE PROGRAM

## WHAT IS IT?

The Make a Difference Program provides *optometry students* an opportunity to fit a patient who lacks financial resources, with CooperVision Specialty EyeCare contact lenses.

CooperVision Specialty EyeCare will provide students and prescribing university practitioners with a pair of complimentary warranted lenses to help fit a patient in need. Each student is allocated 1 pair of specialty lenses for 1 patient per school year.

## LENS DESIGNS

Eligible lens designs include:

If fitting an orthokeratology lens design, both the prescribing practitioner and student must be certified prior to placing the lens order.

## ELIGIBILITY

There are no patient age restrictions. CooperVision Specialty EyeCare leaves it to the discretion of the university clinic to determine who is a financially eligible candidate.

The Make a Difference Program solely provides a pair of warranted lenses at no cost. Coverage or reimbursement for additional fees such as clinic and examination fees are excluded from the program.

## ORDERING LENSES

Lenses can be ordered through technical consultation by email. Please provide university account number, patient name, requested lens parameters, shipping address, prescribing practitioner and student name.

## COOPERVISION GIVES BACK

### *Why did We Create the Make A Difference Program?*

CooperVision Specialty EyeCare is a company that gives back, and we believe the Make a Difference Program is a helpful and practical way to do this.

If you are a student, we encourage you to take part in this program and reach out to a patient in need.
